## PROFESSIONAL SUMMARY

Full-Stack Web Developer with hands-on experience building modern web applications using Next.js, React, Node.js, Express.js, MongoDB, and Tailwind CSS. Experienced in developing SaaS platforms, dashboards, marketplaces, authentication systems, REST APIs, and payment integrations. Built and deployed 20+ web development projects, including SaaS platforms, marketplaces, dashboards, and business applications. Passionate about creating scalable, user-focused applications and contributing to high-performing development teams.

## TECHNICAL SKILLS

**Frontend:** Next.js · React.js · JavaScript (ES6+) · HTML5 · CSS3 · Tailwind CSS · HeroUI · DaisyUI

**Backend:** Node.js · Express.js · REST API Development · Better Auth · Firebase Auth · JWT Authentication

**Database:** MongoDB · Firebase Firestore · Database Design · CRUD Operations

**Payments & Security:** Stripe · Role-Based Access Control (RBAC) · Protected Routes · OAuth 2.0

**Tools & Deployment:** Git · GitHub · Vercel · Netlify · Postman · VS Code · Figma

**Soft Skills:** Problem Solving · Communication · Team Collaboration · Remote Work · Time Management

## PROFESSIONAL EXPERIENCE

**Full-Stack Web Developer** · *Personal & Freelance Projects* 2024 – Present

- › Built and deployed 20+ web applications using Next.js, React.js, Node.js, Express.js, and MongoDB.
- › Developed authentication systems using Better Auth, Firebase Auth, Google OAuth, and role-based access control.
- › Designed and integrated REST APIs with protected routes and scalable backend architecture.
- › Implemented Stripe payment processing, booking systems, dashboard analytics, and user management features.
- › Deployed applications on Vercel and Netlify with GitHub-based CI/CD workflows and environment configurations.
- › Built responsive, mobile-first interfaces optimized for desktop, tablet, and mobile devices.

**Freelance Consultant** · *Remote — International Clients* 2015 – Present

- › Delivered 240+ international freelance projects managing client communication, requirements gathering, and delivery.
- › Worked with clients across startups, agencies, SaaS businesses, and service companies globally.
- › Developed strong skills in problem-solving, project management, and asynchronous remote collaboration.
- › Maintained long-term client relationships through consistent delivery and proactive communication.

## FEATURED PROJECTS

**TaskForge – Freelance Marketplace Platform**

[Live Demo](#) | [GitHub](#)

**Stack:** Next.js · React · MongoDB · Stripe · Better Auth · HeroUI · Tailwind CSS

- › Built a full-stack freelance marketplace connecting clients and freelancers through task posting, proposal management, and project collaboration.
- › Integrated Stripe payment processing to support secure transactions and platform monetization.
- › Built role-based dashboards for clients, freelancers, and administrators with fine-grained access control and protected routes.
- › Designed scalable REST APIs and MongoDB data models to manage users, tasks, proposals, and payments.
- › Delivered a responsive, mobile-friendly UX using Next.js, Tailwind CSS, and HeroUI component library.

## HireLoop – Recruitment Platform

[Live Demo](#) | [GitHub](#)

Stack: Next.js · React · MongoDB · Better Auth · HeroUI · Tailwind CSS

- › Built a recruitment platform enabling recruiters to manage companies, publish jobs, and review applications at scale.
- › Implemented secure authentication and role-based authorization for recruiters, job seekers, and administrators.
- › Developed recruiter dashboards with company management, job posting, and applicant tracking workflows.
- › Created reusable UI components and responsive layouts to improve usability across all screen sizes.
- › Designed backend APIs and MongoDB schemas for scalable job, user, and application management.

## ASSETVERSE – Asset Management Platform

[Live Demo](#) | [GitHub](#)

Stack: React · MongoDB · Stripe · Tailwind CSS · Express.js · Firebase Authentication

- › Developed a full-stack asset management platform for tracking and managing organizational assets.
- › Implemented Firebase Authentication and protected routes with role-based access control.
- › Built asset creation, assignment, status tracking, and management workflows.
- › Designed responsive dashboards, search, filtering, and reporting functionality.
- › Integrated REST APIs and MongoDB for scalable asset data management.

## StudyNook – Study Room Booking Platform [Live Demo](#) | [GitHub](#)

Stack: Next.js · Node.js · Express.js · MongoDB · Better Auth · Google OAuth

- › Developed a study room booking platform enabling users to create, discover, and reserve study spaces.
- › Implemented Better Auth and Google OAuth with protected routes and user-specific permissions.
- › Built a booking management system with conflict prevention, cancellation handling, and availability tracking.
- › Added advanced search and filtering functionality to improve room discovery and overall user experience.
